EUROPEAN UNION ROHS DIRECTIVE COMPLIANCE

Severstal North America, Inc. ("SNA") is a manufacturer of high quality zinc-coated and uncoated flat-rolled carbon steel. With regard to European Union ("EU") Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment (ROHS), to the best of SNA's knowledge and belief, SNA steel product does not contain cadmium, hexavalent chromium, lead, mercury, polybrominated biphenyls, and polybrominated diphenyl ethers as either intentionally added ingredients or as unintended impurities in concentrations exceeding EU regulatory limits. SNA does not use these materials in the manufacture of its steel product.
